

Cover Letter

Dear Hiring Team,

I am writing to express my interest in security analyst-related opportunities within your team.

My background is centred on Security Operations and threat-focused analysis, with hands-on experience working with SIEM platforms such as Splunk and the Elastic (ELK) Stack. My work has primarily involved analysing security events, investigating suspicious activity, triaging alerts, and developing a structured approach to identifying anomalous behaviour within log data.

Through practical projects and continuous self-driven learning, I have developed a strong foundation in SOC workflows, detection-oriented thinking, and incident analysis. I am particularly comfortable working with event logs, validating alerts, documenting investigation steps, and supporting response activities with a disciplined and analytical mindset.

Beyond technical skills, I place strong emphasis on clear communication, documentation, and collaborative problem-solving. I value environments that encourage curiosity, continuous improvement, and thoughtful security practices, and I enjoy contributing to teams focused on strengthening visibility and defensive capabilities.

I would welcome the opportunity to bring my analytical approach, security awareness, and SIEM experience to your organisation. Thank you for your time and consideration.

Kind regards,
Ejiaku
